

Harvard Research Data Access & Innovation Symposium

HMS IT cordially invites you to attend the inaugural Harvard University Research Data Access and Innovation Symposium. Recognizing the need to initiate a dialog within the University research community, as well as the need to raise awareness around potential use and current limitations of resources for data access, the Symposium aims to target the interests of biomedical researchers, data scientists, data managers and curators, and librarians. This forum will provide an opportunity to discuss local and universal challenges relating to data management, access, sharing, and security; the resources available to the Harvard Community; and innovative data management strategies, by bringing together investigators and administrators, IT experts, and representatives from funding agencies and industry, with the goal of initiating an ongoing conversation between investigators and Harvard resource providers.

Keynote and Highlighted Speakers

- Philip Bourne, NIH Associate Director for Data Sciences
- Merce Crosas, Director of Data Science at the Institute for Quantitative Social Science, Harvard University
- Lynette Hirschman, Chief Scientist, Biomedical Informatics in the Information Technology Center at the MITRE Corporation
- Pearl O'Rourke, Director of Human Research Affairs, Partners Healthcare

Date/Location

- Monday, October 26, 2015
- Joseph B. Martin Conference Center

Registration

- Registration is free to the Harvard University community, but space is limited
- For more information and to register for the Symposium, visit:
